

Secondary Service Centre

CAHIR – TOWN STATEMENT

Context

Cahir is located to the centre of the County, and is identified as Secondary Service Centre in the Draft County Development Plan. Cahir Town has a dedicated Local Area Plan – *Cahir LAP 2005*, this should be referred to for further detail

Infrastructure

Water Supply: There are water supply difficulties in Cahir; options for expansion of Ballylooby Springs to cater for short term augmentation to the water supply are being investigated, upgrading works may be required to accommodate new developments.

Waste Water: There is a municipal wastewater treatment system in Cahir but it is at capacity and an upgrade is required, such an upgrade subject to condition would have a minimal environmental risk.

Development Objectives

Please refer to the detailed development objectives as set out in the Cahir LAP 2005.
